## PG7601, PG7102, PG7202 or PG9000 in high line differential mode up to 20 MPa (3000 psi)

Can use a <u>3990 Manual Pressure Control Pack</u> with a <u>3893-801 Pressure Adjustment Assembly</u> (variable volume), additional isolation valve, and fittings/tubing.

Figure below is from <u>High Line Differential Pressure Application Note</u>
